# UltraShield HPLC/UHPLC Precolumn Filters

- Economical protection against micro-particles
- Extends column lifetime
- Negligible effect on column performance
- Universal fit, connects directly to column
- Leak tight to 15,000 PSI

UltraShield Precolumn Filter

*UltraShield* direct connect precolumn filters provide economical protection from the harmful effects of sample and mobile phase particulates on modern UHPLC and other high resolution HPLC columns. *UltraShield* was engineered specifically for use in fast, high efficiency separations requiring high mobile phase velocities and ultra high pressure. *UltraShield* maintains the efficiency of these high performance columns assuring no loss of critical resolution. With its simple design, *UltraShield* installs in any analytical column in seconds and is leak tight to 15,000 PSI. Simply tighten the filter with a wrench until it is snug, followed by an additional 1/4 turn.

## Specifications

Inlet/Outlet: Female/Male 10-32

Port Geometry: Halo, Waters (1/16 CPI)

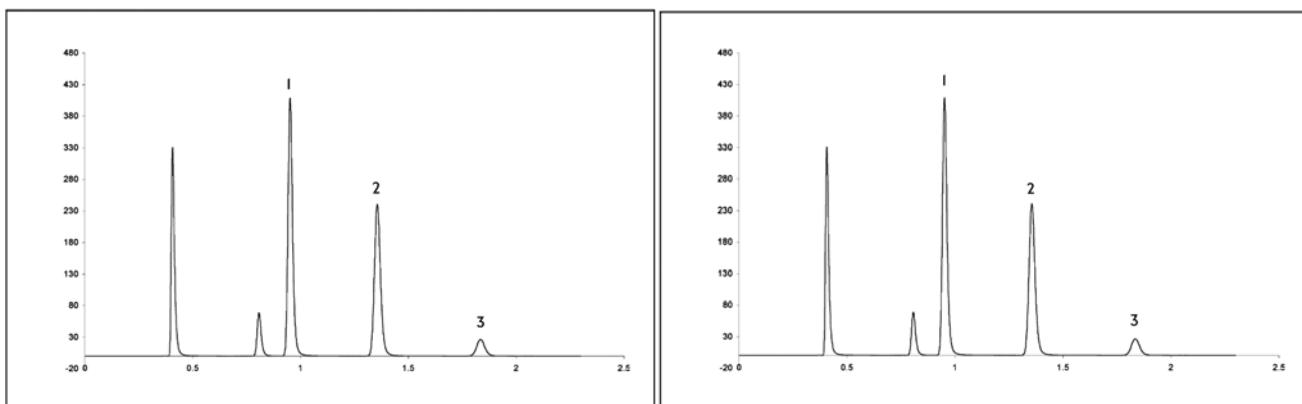

Wetted Material: SST, PEEK ferrule

Frit: 0.5 and 2 micron SST or Titanium

Pressure Rating: 15,000 PSI

Wrench Flat: 5/16"

## UltraShield Precolumn Filters Maintain Critical Resolution

As the above chromatograms illustrate, UltraShield Precolumn Filters maintain the theoretical plates, N, of very efficient UHPLC columns.  
Column: 4.6 x 50 mm HALO® C18 Fused-Core®

	Peak 1	Peak 2	Peak 3
N w/o UltraShield	10,542	11,459	10,796
N with UltraShield	10,307	11,457	10,784
% Change	-2.2%	0%	-0.1%

Note: The above performance data applies to both UltraShield and ColumnShiel Precolumn Filters

# ColumnShield Precolumn Filters

**Economical protection against micro-particles**

**Extends HPLC column lifetime**

**Negligible effect on column performance**

**Universal fit, connects directly to column**

**Fingertight to 5,000 PSI**

**UltraShield Precolumn Filter**

*PrimeLine* ColumnShield precolumn filter provides economical protection from the harmful effects of sample and mobile phase particulates on modern HPLC columns. The disposable filter was engineered to maintain the efficiency of high performance columns assuring insuring no loss of critical resolution. With its simple design, the filter installs in any analytical column or guard column in seconds and is leak tight to 5,000 PSI. To install simply hand tighten the filter as you would with any fingertight fitting while holding the column stable.

Description: Titanium Filters	ASI Part Number
ColumnShield Precolumn Filter, 0.5 micron	850-1050T
ColumnShield Precolumn Filter, 0.5 micron, 5/Pack	850-1050T-05
ColumnShield Precolumn Filter, 0.5 micron, 10/Pack	850-1050T-10
ColumnShield Precolumn Filter, 2 micron	850-1051T

ColumnShield Precolumn Filter, 2 micron, 10/Pack	850-1051T-10

## **Specifications**

Inlet/Outlet: Female/Male 10-32

Frit: 0.5 and 2 micron Titanium

Port Geometry: Halo (1/16 CPI)

Pressure Rating: 5,000 PSI

Wetted Material: PEEK

Fingertight: No wrench required

# In-Line & Direct Connect HPLC/UHPLC Column Filters

**Cost effective way to extend column lifetime**

**Replaceable filter element**

**Negligible effect on column performance**

**Universal fit, connects directly to column**

**Leak tight to 18,000 PSI**

*PrimeLine* direct connect precolumn filters provide economical protection from the harmful effects of sample and mobile phase particulates on modern HPLC and UHPLC columns. The *PrimeLine* precolumn filter was engineered specifically for use in high throughput and routine HPLC separations where mobile phase and sample contamination cause a decrease in column performance or premature column failure. The low swept volume of the *PrimeLine* filter maintains the efficiency of high performance columns assuring a negligible loss of critical resolution. With its simple design, the *PrimeLine* filter installs in any analytical column in seconds and is leak tight to 18,000 PSI. Simply finger tighten initially, then wrench tighten an additional 1/4 - 1/2 turn.

**In-Line Filter**

**Direct Connect Column Filter**

## **Specifications**

Inlet/Outlet: Female/Male 10-32

Wetted Material: SST housing and ferrule

Frit: 0.2 to 20 micron SST, Titanium is also available

Pressure Rating: 18,000 PSI

Wrench Flat: 3/8"

# In-Line HPLC/UHPLC Column Filters

Port compatibility: Halo

# High Capacity HPLC/UHPLC Filters

Placed between the pump and injector, these filters protect the injector from pump seal wear material and extend the life of the column prefilter. All filters are made from 316 stainless steel and are rated to 6,000 PSI. Filters for UHPLC are rated to 15,000 PSI. All male/female ports are compatible with 10-32 compression fittings.

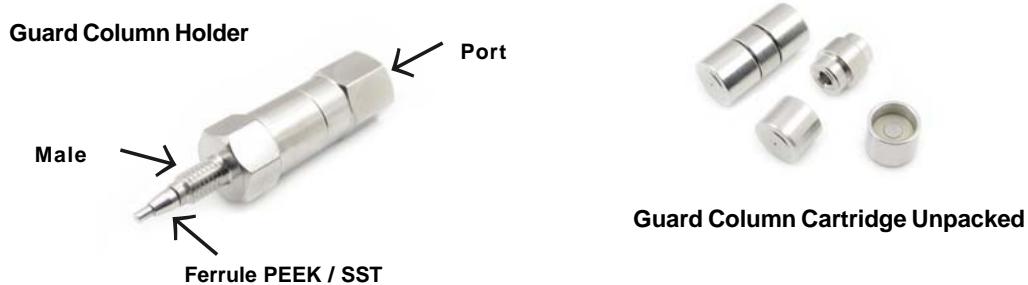

This filter features a clean-swept internal volume and a large 2.1 cm<sup>2</sup> filter area that will provide a long service life. Filter cartridges are available in 0.2micron, 0.5 micron and 2 micron porosity, and are both interchangeable and replaceable. Total internal volume is 90 µL for 0.2 micron filter, 100 µL for 0.5 micron filter, and 120 µL for 2 micron filter.

2 micron Replacement Filter Cartridge for HC	850-1320

# Guard Column HPLC/UHPLC Hardware

The *PrimeLine* direct connect guard column provides economical protection from the harmful effects of sample and mobile phase particulates and soluble contaminants on modern HPLC and UHPLC columns. The low swept volume of the *PrimeLine* guard column maintains the efficiency of high performance columns assuring a negligible loss of critical resolution. With its simple design, the *PrimeLine* guard column installs in any analytical column in seconds and is leak tight to 15,000 PSI.

Description	Internal Volume	ASI Part Number
